PROFILE

Full-Stack Developer specializing in **React.js, Next.js, Node.js, Express.js, MongoDB, and Redis**, with hands-on experience building and deploying **5+ production-ready web applications**. Proven expertise in architecting **RESTful APIs**, **JWT/OAuth 2.0** security, real-time **Socket.io** systems, and **LLM/AI API integrations**, with a strong focus on database query optimization and scalable system design.

SKILLS

Languages & Databases: JavaScript (ES6+), TypeScript, Java, SQL, MongoDB, PostgreSQL, MySQL, Redis
Frontend: React.js, Next.js, Redux Toolkit, RTK Query, Tailwind CSS, Bootstrap 5, Figma
Backend & Architecture: Node.js, Express.js, REST APIs, Microservices, System Design, JWT, OAuth 2.0
Cloud, Tools & AI: AWS (EC2, S3, ECS, ECR), Linux (Ubuntu), Docker, Git, Cursor, Copilot, Gemini/OpenAI APIs, AI Integration

PROJECTS

SkillSync AI – Live *May 2026 – Jun 2026*

- Built a full-stack AI recruitment platform using React 19, Node.js, and MongoDB, integrating **Google Gemini AI** for automated resume parsing and candidate-to-job match scoring, reducing manual screening time by **50%+**.
- Developed a high-concurrency **candidate ranking engine** delivering skill breakdowns for **100+ concurrent requests**, implementing application-level fallback caching to maintain **100% uptime** during API quota exhaustion.
- Engineered a fast data layer using **Redis caching middleware** and compound MongoDB indexing, improving data retrieval speeds by **40%** while handling automatic expired-session recovery via global **RTK Query interceptors**.
- Configured real-time workflow alerts via **Socket.io** and hardened end-to-end platform security using Argon2 password hashing, **OAuth 2.0**, and validated **Cloudinary** file streams.

Blood Donation & Emergency Help App – Live *Nov 2025 – Dec 2025*

- Built a full-stack donor-matching platform (React 19, RTK Query, Node.js, MongoDB) featuring automated location/blood-group matching, dynamic Donor/Patient role-switching, and **90-day cooldown enforcement**.
- Secured REST APIs with **3-tier RBAC**, JWT/Argon2 auth, rate limiting, and end-to-end **Zod validation**, integrating the **Brevo REST API** to bypass cloud SMTP port blocks for instant email and in-app alerts.

Smart Leave Management System – Live *Jan 2026 – Feb 2026*

- Led backend development using Node.js, Express.js, and MongoDB, designing RESTful APIs and a secure **4-tier RBAC middleware** (JWT, Argon2) to enforce **hierarchical leave approval routing** and automated balance calculations.
- Engineered real-time **Socket.io WebSocket events** and SMTP email triggers for instant approval notifications, while writing complex **Mongoose aggregation queries** to power administrative reporting dashboards.

EDUCATION

Indore International College *Indore, India*
Master of Computer Applications (MCA) | Pursuing *2026 – Present*
Sant Singaji Institute of Science and Management *Sandalpur, Dewas, India*
Bachelor of Business Administration (BBA) | **CGPA: 7.75** *2023 – 2026*

CERTIFICATIONS

Web Design & Development – Skill India Digital Hub (NSDC) | Completed April 2026
Java Programming Certificate – Core Java, OOP & Data Collections | Nov 2024
